HTML, CSS, BOOTSTRAP

Shopping site

shopping web site provide the good shopping experience .

This shopping web site provide the good shopping experience as I make design light weight and eye catching to achieve this I use CSS3 and Bootstrap5, I front page customer will know about all category that are available in shopping site, if they are already sign-in then can see all product and if not they can sign-up to see all the product to achieve this functionality I use JavaScript, MongoDB to connect and store user credential, On click to the product customer see the individual product with all detail related to it including shipping date , material use, images , price etc, On add to cart click customer can add product to its cart if a product is already add to cart then customer is redirected to cart page where customer can change the quantity to any number but not more than available quantity.

HTML5, CSS3, JavaScript, Bootstrap-5
